

**Take part to the contest “Let’s post our Landscapes on TALKSCAPES”!**

“Let’s post our Landscapes on TALKSCAPES” is the engagement contest launched within the ERASMUS+ “TALKSCAPES - Talking about us and our European Communities by talking about our life landscapes” Project, funded by the Romanian National Agency ANPCDEFP (Agentia Nationala pentru programe comunitare in domeniul educatiei si formarii profesionale) with respect to the KA229 2018 Call – *Strategic partnerships for Schools’ interchange*, and promoted and being implemented by a Partnership between Our School, Colegiul National Economic “Andrei Barseanu” and 4 European Schools of Bulgaria, Poland, Greece and Italy .

According to the primary topic of the TALKSCAPES Project focusing on European Landscapes as “daily life sceneries” of local communities and, in this sense, socio-cultural mediation, integration and identity “agents”, the contest “Let’s post our Landscapes on TALKSCAPES” will represent a first opportunity to engage both all our Educational Community and our Citizenry in identifying landscapes particularly significant for localities in which each one is living and/or where has lived in past. All this to be made through postal cards, meaning just analogic ones and, therefore, the classic paper-made and illustrated cards, not digital ones, representing urban and non-urban landscapes, that everyone interested in participating the contest would bring to Our School, or instead would mail to our School’s address.

Everyone interested in supporting us in collecting those special kind of portrayal of our European Landscapes, will be asked to engage her/his own parents, relatives and friends involving them in identifying many other significant landscape of the respective (daily or past) life localities, by mailing to our School’s address postal cards both more ancient and contemporary.

In this sense, everyone will participate in our contest “Let’s post our Landscapes on TALKSCAPES”, will be asked to indicate on the back side of each postal card these 3 following data:

- Locality represented, Region, European Country
- Official denomination of the represented locality both in National Language and in local language/dialect version, and, whereas it will be possible, also in one or more official Languages of the European Union
- A brief description of the landscape represented within the postal card, highlighting its own most significant characteristic elements.

All collected postal cards will be catalogued and digitalized by the TALKSCAPES Project workgroup and landscapes represented through them will be mapped within the TALKSCAPES Project web public platform.

The most beautiful postal cards, according the same TALKSCAPES Project workgroup, will be published weekly on the web platform.

Moreover, all the postal cards will constitute an archive of fundamental tiles of a growing European Landscapes mosaic on top of which it will be implemented also the *ERASMUS+ corner* at each one of the 5 partner Schools, during the entire project realization period.

So, what are You waiting for? Take part in the contest and mail to our School address Your best landscape postal cards!
